WATER SERVICE AGREEMENT

RURAL WATER SUPPLY FORM

All details must be completed for this application to be considered. Please write 'N/A' in non applicable fields.

Details of property where water service connection is requested

Lot no. DP no. Street no.

Street name Town

Yes No Water will be delivered directly to storage tank (with air gap) as per conditions of the 'Rural Water Supply Policy'

Yes No I give permission for a Council Officer to inspect my property now, and in the future, to ensure internal connections comply with the Rural Water Supply Policy. Council may accept the determination of a licenced plumber, in lieu of an inspection, if this evidence can be provided to Council.

Declaration

The undersigned confirm they have read and accept the terms as set out on page 2 of this form and conditions that are in accordance with the Local Government Act and Council's Rural Water Supply Policy.

Owner

Water Service Agreement Terms

1. A 'Private Works' quotation will be provided to the property owner by the appropriate Council Officer upon review of this form and/or inspection of the property. This quotation will then need to be accepted before the water service can be installed. Completion of this form alone does not guarantee that a service will be provided.
2. Use of water from any storage tank automatically supplied with town water will be subject to any water restrictions that are applicable to the connected water supply, regardless of whether it can also be filled from an alternative source.
3. Internal pipework is recommended to be PN12.5 or higher. Council will not accept liability from internal service breaks caused by high or variable pressures.
4. It is the property owner's responsibility to ensure the meter is adequately protected. The cost of any repairs to the meter or meter point is recoverable from the property owner, including call-out fees for work out of business hours.
5. Whereas Upper Hunter Shire Council will endeavour to connect the service at the point nominated on the diagram by the applicant, this may not always be possible and is subject to approval by the Water & Sewer Manager.
6. All meters are to be readily accessible for meter reading purposes as far as practicable.
7. All meters shall be supplied by, and always remain the property of, Upper Hunter Shire Council.
8. Water is to be used for stock and domestic watering only. Upper Hunter Shire Council does not guarantee the quality of any rural water supply and recommends additional treatment prior to human consumption.
9. Connection is by request and subject to approval by Council. A connection fee is payable and a separate capital contribution may also be required.
10. Disconnection from the water supply will incur a disconnection fee whether disconnection has occurred at the request of the property owner, or due to a breach of the conditions of the water service agreement.
11. All water supplied must be used within the boundaries of the property supplied.

For full terms refer to Council's Rural Water Supply Policy available at upperhunter.nsw.gov.au

Draw locality and block diagram showing desired location of meter along front boundary fence with distance from side boundary (see paragraph 5 above), nearest cross street and north point.

Meter Installation

Standpipe shall be placed so that a minimum 1,200mm of buried rigid pipe shall be installed downstream of the meter. Meter shall be located within the first 1 metre of the property boundary or within 1 metre of the applicable Council water infrastructure.

Meter may be installed below ground within a protective pit by agreement with the property owner. This may incur additional costs.
